

RoadMap of the Thesis

Title: Contract to Contract Calling in Algorand for a Use Case

Scope of Work

- Provide a brief history of the issues to date.
- Situate your particular topic within the broad area of research
- Note that the field is changing, and more research is required on your topic.

Introduction

0.1 Problem Statement

- Identify a key point of concern (for example, increasing use or prominence, lack of research to date, response to an agenda, a new discovery, or perhaps one not yet applied to this context).
- Refer to the literature only to the extent needed to demonstrate why your project is worth doing. Reserve your full review of existing theory or practice for later chapters.
- Be sure that the motivation, or problem, suggests a need for further investigation.

Aim and Scope

- Be sure that your aim responds logically to the problem statement.
- Stick rigorously to a single aim. Do not include elements in it that describe how you intend to achieve this aim; reserve these for a later chapter.
- When you have written the conclusions to your whole study, check that they respond to this aim. If they don't, change the aim or rethink your conclusions
- If you change the aim, revise the motivation for studying it.

- Be sure to establish the scope of your study by identifying limitations of factors such as time, location, resources, or the established boundaries of particular fields or theories.
